Palmako AS is the leading manufacturer of garden and log houses, glue-laminated products and wood pellets. Our product range is wide: square log garden houses, garden cabins, garden sheds, pavilions, carports, tool sheds, children’s playhouses, and weekend and living houses. We also offer wide choice of timber products in your garden – fence panels, posts and poles, wooden furniture, log rolls and terrace boards.

Catalogue models are kept in stock year-round for quick delivery throughout the world. Our products are well known for their quality because we used the best raw material available: durable and beautiful Nordic spruce. Palmako is FSC certified, and products made from FSC timber have been marked accordingly.

Over 20 years of experience in wood industry has made us one of the leading companies in this area in Europe today.
You will find available treatment options next to each product under the Treatment Options section.

Painted products in drying chamber

A solution that is forced into the wood under high pressure. For vacuum pressure impregnation, we work with different processes depending on the type of wood, environment and end purpose.

We have invested into modern painting technology that enables us to paint smaller sized garden products like fence panels and posts. Today we are able to paint the products white, using flowcoating method and spray chamber method. After painting, the products will dry in a 30 meter long drying chamber, where the whole process of drying can be adjusted and observed.
Dear Customer,

Once again we are very glad to present our brand new catalogue for 2018 to you. We have put a lot of effort into product development, designing and completing the product range perfectly. Since the garden itself embraces so much more than only garden buildings, we have expanded our garden product selection, but we still use wood as a natural, warm, friendly and renewable material. Every year we broaden our product selection for your garden. So sit back and let us introduce you to our world of wooden garden products.

We have made planning and designing your garden really simple – with our products you will find solutions for every need. If your garden lacks a garden house or storage room for tools, a carport or a fence for a terrace, elegant fence panels, furniture or flowerboxes, please get familiar with our products and find yourself the best solutions.

To protect your products from the effects of weather, wood-destroying fungi and insects, we truly recommend using our product treatment service. Depending on the product type, we are able to dip, pressure-treat or paint our products (initially painted white). Please read more about treatment possibilities on pages 236-237.

We continually appreciate your feedback regarding our products and services and we are eager to know how you have used our products. You are welcome to share your ideas, proposals and photos with us by sending an e-mail to info@palmako.ee or via our homepage www.palmako.ee.

We wish all our customers a successful 2018!

Ingrid Lamp
Marketing Manager
The joy of being in the garden.

The garden – our connection with nature.

We live our lives at crazy speeds amid droves of people, and every day we become increasingly more alienated from nature. Going outdoors takes time and money, and is an all around taxing experience. However, our ancient selves don’t want to stop smelling the grass in the morning or seeing the light of the setting sun through tree branches. When we go back to the past along this line of heritage, we quickly reach our predecessors, who were peasants, cattle breeders or hunters. Urbanisation is a new phenomenon in human history. A garden is often our last direct point of contact with nature, a reminder of the unity our predecessors felt with the surrounding environment. This feeling is deeply rooted in our subconscious and it makes the existence of a garden and time spent there so important for us.

The joy of being in the garden.

We all strive to achieve ever-greater quality of life. Constantly juggling mountains of work and the need to spend time with our family forces us to look for balance between home and office, between reaping and sowing. It motivates us to emphasise our presence. Our restless spirit and modern life force us out of our comfort zone – searching for greater value in life through social interaction and self-realisation.

Palmako doesn’t build an artificial world with fake emotion and fake people. In the shape of the garden, Palmako extends quality living space, making it a special place in people’s lives. Somewhere they live their real lives. A life which has meaning. Which is filled with quality time spent together, which we share with those closest to us. Somewhere we experience special moments.

We don’t just make garden houses. We don’t restrict ourselves to comprehensive garden solutions, either.

We bring joy to the garden.

A garden is often our last direct point of contact with nature, a reminder of the unity our predecessors felt with the surrounding environment.
The many dimensions to garden life.

The special moments in our lives are different and the roles gardens play in our lives are also different. A garden can be a place of relaxation where you hide from the world. Or it can be a meeting place where you discuss life with your loved ones. A garden can be the place where you devote yourself to your hobbies.

Every material has its character and soul. Wood is warm and beautiful and we understand its life cycle.

A beautiful garden can be our best feature for impressing neighbours and passers-by. It can also be a practical place for growing organic fruit and vegetables for our own use. We believe that quality time has many angles and colours, like an eventful life. We do not make decisions for garden owners; we simply do our best to turn their gardens into special places where moments are inspiring and different, just like people. The more varied our garden is, the more joy it brings us.

Timeless garden wood.

We have used wood to build our houses and gardens since ancient times, and it has accompanied us throughout the centuries of our development. Every piece of wood has its own character and soul. Wood is warm and beautiful and we understand its life cycle. Like us, trees move in a circle of life, growing and living in the time given to them. The constantly repeating cycle makes wood a renewable resource, and using resources responsibly is increasingly more important in the context of growing environmental problems. Wood produced through correct and fair management is undoubtedly one of the best choices of our time. Wood is timeless – ancient and familiar on the one hand, and a building material with a clear future on the other.
New this year

As you may have already noticed, once again our garden product selection has reached new heights. Hopefully, after reading this page you will have new knowledge and endless inspiration for designing your own garden in a way you have never imagined before.

We have made finding new products in our catalogue really easy. Just look for brown squares and yellow circles with products marked „New!” in the index and products overview pages in front of every product category and next to products. If you search for them carefully, you will find them next to 112 new products. The merger with our sister company Imprest has significantly increased our range of swings and playgrounds. We have also developed new sandpits with a removable play table. Please notice that all our swings, playgrounds and sandpits are certified by TÜV Rheinland. It is an additional safety and high quality guarantee to the customer that the product itself as well as its manufacturing process are tested and supervised with the upmost of care.

And more, this year we have a brand new product category called Nordic+ houses. These Scandinavian-style houses surprise you with wall thickness of 160 mm. For better house ventilation we have added ventilation battens under the cladding. Ready-made wall elements are covered with wind-protection plastic inside, making these houses extremely weatherproof. There is an opportunity to fit 95 mm insulation in the walls, floors and ceilings.

In our fence panels selection we have added airy and elegant panels in the Light series with 33x57 mm frame profile. You can choose from among seven designs and seven dimensions which ones will best suit your garden. All fence panels are available only treated – either in green pressure treatment or in white painted (primer plus two layers of paint).

In the fence and gardening category you will find products you have never seen in our catalogues before – fences for terraces and stairs pp. 200-201, heat pump cover p. 223 and stair stringers p. 225. If you love adding wooden furniture to your garden, this year we have not held back – there are many new garden furniture models that will bring your family and friends together.

And in the optional product section we would like to introduce you to our high quality SBS roofing material. Until now we have offered roofing felt suitable as an underlayer. As an addition to it SBS roofing material is a step towards longer-lasting roofs. Please read more about it on p. 229.

Hopefully this gives inspiration and encourages you to pick up great products and solutions for your garden.
Our value-added chain starts from Estonian forests, for accelerating the growth of which we organise forest planting events each spring.

We manage forests prudently, ensuring thereby the sustainability of Estonian forests. For us it is important to know that we can be confident in the heritage of the timber.

Primary processing of timber is performed in saw mills partially owned by the Lemeks Group. We like it that as a natural material timber has many application areas. The possibility to reuse it adds even more value to it.

Palmako is a part of the Lemeks Group.

Lemeks AS was founded in 1993 with an aim of creating a modern forest stocking company systematically covering the whole country and on the basis of which a timber industry could be established that values local timber.

Today, the Lemeks Group has developed into the biggest forestry company in Estonia that is funded by Estonian capital, and operates successfully in the sphere of timber processing and forest stocking as well as in agriculture. 29 subsidiaries and related companies provide employment to more than 850 people in Estonia, Latvia, Germany, Sweden, Norway, France, Spain and the United Kingdom.

Belonging to the Lemeks Group provides Palmako support in financial, IT and personnel management. It also gives an excellent opportunity to share valuable information and experience with other specialists in the same field. The existence of belonging to the group's value chain ensures the supply of raw material even during harder times.

More about the Lemeks Group on the website www.lemeks.ee
Our value-added chain starts from Estonian forests, for accelerating the growth of which we organise forest planting events each spring. We manage forests prudently, ensuring thereby the sustainability of Estonian forests. For us it is important to know that we can be confident in the heritage of the timber.

Primary processing of timber is performed in saw mills partially owned by the Lemeks Group. We like it that as a natural material timber has many application areas. The possibility to reuse it adds even more value to it.

Glued laminated timber manufactured by us gives building structures and elements the best load-bearing capacity and durability.

Companies belonging to the Lemeks Group give timber new life. We use it to manufacture playgrounds, summerhouses, industrial buildings and many other items with the aim of making the surrounding environment natural and closer to the nature.

We do our everyday work efficiently and we use timber processing waste in new and sustainable value-added forms.
Principles that we follow in our everyday work:

- We are honest
- We are goal-oriented
- We are open to changes
- We are willing to take responsibility
- We respect our partners
- We assess our colleagues by their results, not by their words
- We share our knowledge and skills with each other
- We aim to do, rather than impress

We have invested over 25 million euros in modern, professional technology, which has enabled us to use the best machinery to make our products.

Leading manufacturer in Europe

Palmako produces and exports over 50,000 wooden houses per year, and 20 years of active operation have given us significant experience to become Northern Europe’s leading manufacturer and distributor of square log garden houses.
In addition to log cabins, Palmako manufactures wide selection of garden products, glulam products and heating pellets.

Estonia is regarded as the biggest wooden house exporter in the Europe. Palmako plays a significant part in this. Our products are found in more than 30 countries around the world.

Social responsibility

Although wood is a sustainable and regenerative natural resource, forestry requires careful and responsible management. An uncaring and irresponsible attitude towards forestry management will inevitably harm our environment significantly. We all have heard stories about the loss of some rainforests, but this concern applies equally to our Nordic forests as well. Palmako is FSC® certified, ensuring that we use wood from responsibly managed forests. We care about the environment, which we share and in which we all live. We really do.

5-year warranty

Over the last 20 years we have produced over half a million wooden houses. We use only the latest technology to make no compromises on quality, and to make sure that the nature and it's resources are handled in the best possible way. We really care about the environment that we all share. We hope that already offers a reason to trust us, but we also place a 5-year warranty on our buildings and 2-year warranty on our playgrounds and swings for your complete peace of mind.

Excellent customer service

We keep stock of our re-sellers to ensure fast, precise deliveries throughout Europe, and we are ready to deliver our products directly to the end customer’s backyard if required. As a multilingual company, we can service our customers in 8 different languages – English, German, French, Spanish, Finnish, Swedish and Norwegian as well as Estonian.

Nordic spruce

Wood is an impressive, warm and living material. And nothing compares to the wonderful aroma of fresh timber. During the long, cold winters the trees grow slowly, which makes their timber especially thick and durable. You can feel it in all our products - comfortable garden and log houses, pavilions, carports, tool sheds, children's play houses, weekend and living houses, glue-laminated products, and wood pellets.
2018 Catalogue User Guide

Parts of the catalogue

**Introductory pages**, where you can find information about us, p. 1-9

**Products**, divided into classes according to their function, p. 14-225

**Information about how to navigate** optional products’ pages, p. 10-13

**Optional products**, list of all those that Palmako offers, p. 226-237

**Special pages** – i-Swings introduction, p. 24; quote request for cottages, p. 104; Nordic houses introduction and information on assembly, p. 108-109; Nordic+ houses introduction, p. 119; fence Light series introduction, p. 182; fence Premium series introduction, p. 190
Structure of products' pages

FUNCTION
All our products are organised into separate classes according to their function and each class begins with an overview of all the items that it includes.

- Cabins: outbuilding and leisure
- Pavilions: Outdoor leisure
- Fences: Fence panels

TYPOLOGY
Products of the same type and purpose carry the same name.

In each class products have been assembled into smaller families according to their design.

Families are made up of products that carry similar external characteristics, like type of roof, door and window type and placement, terrace and overhang of the front roof.

- Gable roof
- Flat roof
- Pent roof

- Helena cabin family
- Irene cabin family
- Lotta cabin family

SIZE
Under each family the products are presented in the order of ascending surface area with increasing wall thickness and in some cases improvement of the quality of doors and windows.

- 15.1 m²
  Palmako cabin
  Helena

- 18.6 m²
  Palmako cabin
  Helena

- 24.6 m²
  Palmako cabin
  Helena
How to read product information

Name of the product
We have put a lot of thought into naming our products and as a result, the name of the chosen product reflects its function, family and size (also additional area when a terrace or side roof is included).

BRAND – Palmako   FUNCTION – cabin   FAMILY – Elsa   SIZE – surface area 8,7 m²

Product information
Each page contains one or two of our products with all the information about it listed as symbols or as text. This example below will help you read and understand product information better.

PALMAKO CABIN ELSA 8,7 m²

PALMAKO i-SWINGS CLARA, CAROL AND CARMEN

i-Series swing sets are trendy products suitable for home delivery. The letter “i” hints that these swing sets can be sold on the internet. The pack sizes of Clara, Carol and Carmen are perfect for shipping by international courier companies directly to your home. Each swing set consists of three or four packs. Lifting packs is easy because the weight of one pack does not exceed 30 kg.

Clara

Perfect for children who want to swing at the same time. Clara has two swings – one plastic swing and one flexible swing. so your children can switch swings whenever they want and enjoy being a kid.

Carol

Children change their minds fast – one moment they want to swing. the next climb and pretend they are on top of a mountain or on board a pirate ship. With Carol we have combined swings and a climbing ladder so your children can use all their creativity for playing in their fantasy world.

Carmen

With Carmen we have added an extra activity place to our two-swing set – a platform for a slide so your kids can have more fun while playing. Swinging, climbing to the top of the platform on the ladder and sliding down can be an exciting game for a child. At the end of the day your kids will probably be so tired of playing on the playground that they will fall asleep quickly. to be ready for new adventures the next day.

ROOF COVERING MATERIAL FOR FLAT ROOF HOUSES

In this section of the catalogue we showed you our flat roof cabin models. It has always been a question what to use as waterproof roof covering material for flat roofs? As you may have noticed, under the section „Optional“ to each flat roof house, there is mentioned special rubber roof covering material – EPDM (ethylene propylene diene terpolymer).

Here are some of the benefits why we truly recommend you to invest in EPDM roof covering material:

- reduces potential condensations problems that can erode performance
- long average service life (can last up to 20 years)
- EPDM is the most dimensionally stable heat resistance membrane and stays flexible even in extremely cold conditions.

EPDM users in colder climate can also benefit from:

- reduced heating costs
- reduced carbon footprint by lowering heating costs
- reduced safety hazard from snow and ice accumulation
- reduced hazardous conditions from frost, dew or ice that is difficult to see on white membranes

We offer EPDM in ready-cut-pieces, the article number of suitable EPDM is given in the table of optional products after every product group and in Optional Products part at the end of the catalogue.

Our EPDM set includes wet-adhesive for installation. The installation of EPDM is easy, just follow the installation manual enclosed with the product.

WE PRODUCE COTTAGES OF YOUR DREAMS

We offer houses with wall thicknesses of 44 mm and 70 mm solid timber, as well as 88 mm, 114 mm and 134 mm laminated timber.

This catalogue includes only some of the models and ideas available for weekend houses – with the help of our architects and bespoke design service we are also able to offer buildings made to your own specific design and requirements.

The 4-side views and ground plans will be supplied when necessary for acquiring a building permit. We can offer you the complete set of wooden details needed for the construction of the house like doors-windows, stairs, cladding for the walls etc. With every house we supply detailed specifications and blueprints for installing the house. All parts have been marked to simplify construction. Please ask for further details.

Individual modifications for all these cottage models in this catalogue are possible! We can also offer these houses with high ‘domestic’ quality doors and windows (starting from 70 mm log thickness).

We hope you will take contact with us if you have a dream cottage vision in your head. Together we will definitely find the best solution bringing it to reality.

NORDIC HOUSES
These contemporary-style buildings with a Scandinavian look and quality are most suitable for a city garden. Palmako Nordic Houses represent our most modern and innovative pre-fabricated house models.

Ready-made wall elements are covered with wind-protection plastic inside, making these houses extremely weatherproof, especially rain and wind resistant. In order to hide cabling (wires, pipes, etc.) there is internal wall-cladding and there is also opportunity for 70 mm insulation. All the houses have double thermo glazing and outwards-opening windows.

**THERE IS A GREAT ALTERNATIVE TO THE TRADITIONAL GARDEN HOUSE!**

**PALMAKO NORDIC HOUSE LY 13.6 m²**

**ARTICLE NUMBER: 101147**

**LY OPTION 1**

**LY OPTION 2**

**LY OPTION 3**

**LY OPTION 4**

**ONE SET – MANY HOUSES!**

A model contains a set of wall and window-door elements, which can be rearranged in several ways. This results in multiple appearance options for the house.

Total element thickness by Nordic houses is 88 mm. Here is a cross section of an element just to get better understanding of what these elements look like and consist of:

These models have 40 mm EPS (Expanded polystyrene) insulated doors, which makes them especially rain and wind resistant.

1. Red wood plywood 10mm
2. Red wood plywood 10mm
3. EPS 50 40mm insulation
4. White wood skeleton 40x40mm
5. Red wood laminated frame 44x105mm
6. Hard wood 28x93mm threshold
7. Hinge 115x84x3mm (3x)
8. 565 lock and lock box

1. 34x70mm frame
2. Wind-protection plastic
3. 18mm fine sawn cladding
FAST & EASY ASSEMBLY

Internal view, walls covered with wind-protection plastic

Wall elements – 10 + 2 pc

Window elements + windows – 2 pc

Door element + door – 1 pc

Ready-made elements and simple construction allow for fast and easy assembly.
Installation video for the Ly model can be viewed at www.palmako.com/eng/ly

Storage
Convenient to store large quantities outdoors, the model is kept in stock all year around.

Unpacking and sorting building units
House kits are compact and contain all the needed accessories for assembly.

Mounting foundation and floor boards
Treated foundation joists and 19 mm floor boards.

Installing wall elements
Ready made wall elements, covered with wind-protection plastic inside.

Installing rafters and roof boards
Ready-made rafters make roof installation easy and fast, roof boards are 19 mm.

Placing door and windows
Double glazed windows ensure good thermal resistance. All windows can be opened.

Covering roof with felt or shingles
Roofing felt is the easiest and fastest way to protect the roof boards against the weather.

2. Includes glue for EPDM installation.
NORDIC+ HOUSES
These Scandinavian-style houses and garages are suitable for any garden that lacks strong, weather-resistant buildings where you can be with your family and friends. Feel free to take your time and delve into the following pages of our best choice of modern, pre-fabricated Nordic+ houses.

Ready-made wall elements are covered with wind-protection plastic inside, making these houses extremely weatherproof, especially rain and wind-resistant. It is comfortable to be in a building when it is warm - we have thought about it and given you an opportunity for 95 mm insulation. You can insulate walls, floors and ceilings. For better house ventilation we have added ventilation battens after cladding. All the houses have double thermo glazing and outwards-opening windows. These models have 40 mm EPS (expanded polystyrene) insulated doors.

One set – many houses!
A model contains set of wall and window-door elements, which can be rearranged in several ways. This results in multiple appearance options for the house. If you like more light in the house you can add extra windows or doors, and please have a look at them on p. 125. Ready-made elements and simple construction allow for fast and easy assembly.

**PALMAKO NORDIC HOUSE CHARLOTTE 21.5 m²**

**ARTICLE NUMBER: 101253**

**CHARLOTTE OPTION 1**

**CHARLOTTE OPTION 2**

**CHARLOTTE OPTION 3**

**CHARLOTTE OPTION 4**

Total element thickness by Nordic+ houses is 160 mm. Here is a cross section of an element just to get a better understanding of what these elements look like and consist of:

1. 44x95mm frame
2. Wind-protection plastic
3. 19x45mm ventilation battens
4. 28x70mm cladding support battens
5. 18mm fine sawn cladding
MODEL SPECIFICATIONS

Wall measurements:
448x548 cm

THE DOOR QUALITY OF MARTIN OLAF AND KALLE SHEDS

Contemporary-style buildings including Martin, Olaf and Kalle sheds have ready-made wall elements covered with wind and moisture protection plastic inside, making these houses extremely weatherproof. A model contains a set of wall and window-door elements, which can be rearranged in several ways. Simple construction allow for fast and easy assembly.

These models have also 40 mm EPS (Expanded polystyrene) insulated doors, which makes them especially rain and wind resistant. Please get familiar with the drawing.

1. Red wood plywood 4mm
2. EPS 50 40mm insulation
3. Red wood cladding 11x114mm
4. White wood skeleton 40x40mm
5. Red wood laminated frame 44x105mm
6. Hard wood 28x93mm threshold
7. Metal kick plate 0,5mm covered with black pural matt coating
8. Hinge 115x84x3mm (3x)
9. 565 lock and lock box
PALMAKO SHED MARTIN 8,4 m²

1 Includes treated joists.
2 Shingles are available in different colours: 107180 = Black, 107182 = Red, 107183 = Green, 107181 = Brown.
3 The article number is indicated to untreated items, for treated items ask our sales team.
FENCE
CREATE YOUR OWN GARDEN STORY WITH PALMAKO FENCE LIGHT PANELS

If your garden misses elegant and airy fence panels, be ready to meet our Fence Light selection. These modern panels give your city garden or terrace a fresh and new look. Here you will find fence panels with a frame profile of 33x57 mm in seven designs.

Please get familiar with designs as follows:

<table>
<thead>
<tr>
<th>Design</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reena</td>
<td>Vertical with rail in the middle. Horizontal trellis.</td>
</tr>
<tr>
<td>Herta</td>
<td>Horizontal with caps and two vertical rails. Vertical trellis.</td>
</tr>
<tr>
<td>Elke</td>
<td>Vertical with rail in the middle. Vertical trellis.</td>
</tr>
<tr>
<td>Helis</td>
<td>Horizontal with caps and two vertical rails. Vertical trellis with one cross.</td>
</tr>
<tr>
<td>Jette</td>
<td>Vertical with rail in the middle. Vertical trellis with one cross.</td>
</tr>
<tr>
<td>Marit</td>
<td>Horizontal with caps and two vertical rails. Vertical trellis with three crosses.</td>
</tr>
<tr>
<td>Karina</td>
<td>Vertical with rail in the middle. Vertical trellis with three crosses.</td>
</tr>
</tbody>
</table>

We have every panel in seven dimensions so you can choose the most suitable sizes for your garden or terrace:

<table>
<thead>
<tr>
<th>Size</th>
<th>1800x1800 mm</th>
<th>900x1800/900 mm</th>
<th>1800x1500 mm</th>
<th>900x1500/900 mm</th>
</tr>
</thead>
<tbody>
<tr>
<td>1800x1800 mm</td>
<td>900x1800 mm</td>
<td>1800x1500 mm</td>
<td>900x1500/900 mm</td>
<td></td>
</tr>
<tr>
<td>900x1800 mm</td>
<td>1800x900 mm</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>900x1500 mm</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

We can give our fence panels two treatments so you can decide which treatment suits your garden the best:

- green pressure-treated
- primer+white painted 2 layers

1. Frame profile 33x57mm
2. Board profile 12x95mm
3. Brads
4. Dowel 10x160mm
5. Water channel
6. Drainage hole to let out any built up moisture or water

All fence panels are made of Nordic spruce which is thick, strong, durable and has small knots.

Imagine sitting in your garden and looking at your magnificent fence panels that border your garden from the neighbours. We have specifically the kinds of panels you are dreaming of – please have a look at our Fence Premium range. These Scandinavian design panels are suitable for city gardens or terraces and make your garden elegant. Here you will find fence panels with a frame profile 44x90 mm in five designs.

Please get familiar with designs as follows:

- **Adele**
  Vertical.

- **Berit**
  Horizontal.

- **Doris**
  Horizontal with caps.

- **Elly**
  Vertical with an upper trellis.

- **Freia**
  Diagonal trellis.

We have every panel in five dimensions so you can choose the most suitable sizes for your garden or terrace:

<table>
<thead>
<tr>
<th></th>
<th>1800x1800 mm</th>
<th>900x1800/900 mm</th>
<th>900x900</th>
</tr>
</thead>
<tbody>
<tr>
<td>1800x1800 mm</td>
<td>900x1800</td>
<td>900x900</td>
<td></td>
</tr>
<tr>
<td>900x1800 mm</td>
<td>1800x900</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

We can give our fence panels two treatments so you can decide which treatment suits your garden the best:

- Green pressure-treated
- Primer + white painted 2 layers

1. Frame profile 44x90mm
2. Board profile 16x111mm
3. Brads
4. Dowel 16x130mm
5. Water channel
6. Drainage hole to let out any built up moisture or water

All fence panels are made of Nordic spruce which is thick, strong, durable and has small knots.

DESCRIPTION
End processing: Pointed & Chamfered (PC)
Surface: Incised
Treatment chemical: Impralin®-KDS; Colour green
Treatment method: Vacuum-pressure-vacuum
Treatment class: HC4;
Pre-dried below 35% of moisture content
Treatment standard: EN351-1 (penetration ≥ 6mm)
Postsaver: Double layer sleeve applied to the ground level point
Warranty: 25 years (ask for terms)
## PALMAKO PREMIUM MACHINE ROUNDED POSTS

### Description
- **End processing:** Pointed & Chamfered (PC)
- **Surface:** Spruce surface incised
- **Treatment chemical:** Impralit®-KDS; Colour green
- **Treatment method:** Vacuum-pressure-vacuum
- **Treatment class:** HC4; Pre-dried below 35% (spruce) or 28% (pine) of moisture content
- **Treatment standard:** EN351-1
- **Warranty:** 15 years (ask for terms)

### Usage
Fence and gate posts, wire or rail fencing, electric fencing, playground structures, ground works

ROOFING NAILS, 2 kg
ARTICLE NUMBER: 106609

PLASTIC BOX FOR LILI
ARTICLE NUMBER: 107430
ROOFING MATERIAL

To keep your house well protected from the weather, we offer you different types of roof covering materials - roofing felt (suitable as an underlayer), SBS roofing material, shingles or EPDM. The second one, SBS roofing material can be attached in a single layer, but it would be temporary solution and will not last as long as attached in multiple layers. It can be welded on the preplaced bottom layer of roof cladding with a gas burner. Attention! For wooden houses please follow the safety requirements, and if possible please let it be welded by professional roofers. The last, EPDM, is perfect for flat-roof models. We offer shingles in four different colours as follows - black, red, green or brown. You can buy roof covering material in full rolls/packs/ready-cut pieces.

Treatment as additional protection for wooden products

Production lines and machines allow us to flexibly arrange procedures and to produce a very wide product range from square log houses with different log thicknesses to the element, prefabricated and large weekend log houses. In addition to other wooden products in your garden – fence panels, garden furniture and machine rounded posts as a brand new product classes from this year.

Unprocessed wood becomes greyish after having been left untouched for a while, and can be turn blue and become mouldy. Treating wood with a preservative effectively protects against wood-destroying fungi and insects, including termites. Therefore, we recommend using our product treatment service.

Depending on the product type we are able to treat the products in different ways. As we have our own treatment baths for brown, grey and clear white dip treatment, cabins and other larger sized items can be ordered treated with Axil 3000 P by the Sarppap & Cecil Industries water-soluble treatment liquid, guaranteeing treatment within classes 1-3. The brown and grey dipping treatment can enhance the colour of your house, but the clear white dipping works for the pre-paint preparation stage.

TREATED AND PAINTED FENCE PANELS

Smaller sized items like furniture can be pressure-treated in the vacuum-pressure-vacuum method giving these items a green or brown shade. All fence panels can be green pressure-treated or white painted (primer plus two layers of paint). In order to extend the service life of timber we treat our products with Impralit®-KDS wood preservative. This is a water-borne, chromium-free wood preservative for the prevention of insect attacks, soft rot and fungal decay. It also offers temporary protection against blue stain and mould. Impralit®-KDS is only to be used for treating wood according to the requirements of use classes 1, 2, 3 and 4 as stipulated in EN 335-1. For wood under cover and in the open, above ground and in ground contact, e.g. poles, fencing, playgrounds, pergolas, etc. The preservative penetrates deep into the wood with the help of vacuum and pressure. In this case a vacuum is initially generated in the cell cavities thereby evacuating the air inside them. The cavities are then filled with a preservative...
solution that is forced into the wood under high pressure. For vacuum pressure impregnation we work with different processes depending on the type of wood, environment and end purpose.

We have invested into modern painting technology that enables us to paint smaller sized garden products like fence panels and posts. Today we are able to paint the products white, using flowcoating method and spray chamber method. After painting, the products will dry in a 30 meter long drying chamber, where the whole process of drying can be adjusted and observed.

You will find available treatment options next to each product under Treatment Options section.

Please get familiar with the article number and description of the treatment we offer as follows:

Bringing joy to the garden

Palmako AS is the leading manufacturer of garden and log houses, glue-laminated products and wood pellets. Our product range is wide: square log garden houses, garden cabins, garden sheds, pavilions, carports, tool sheds, children’s playhouses, and weekend and living houses. We also offer wide choice of timber products in your garden – fence panels, posts and poles, wooden furniture, log rolls and terrace boards.

Catalogue models are kept in stock year-round for quick delivery throughout the world. Our products are well known for their quality because we used the best raw material available: durable and beautiful Nordic spruce. Palmako is FSC certified, and products made from FSC timber have been marked accordingly.

Over 20 years of experience in wood industry has made us one of the leading companies in this area in Europe today.
